EXPERIENCE

IT, Systems & Network Consultant | Synergy Partners LLC

Phoenix, Arizona | July 2026 – Present

Full-time contract for a healthcare services provider covering network, infrastructure, and software

- Eliminated two paid software subscriptions by building an in-house document and e-signature system (sequential/external signing, one-time-code verification, tamper-evident audit trail), cutting vendor cost while keeping signing compliant
- Cut cloud spend and isolated four application environments by building an on-premises Proxmox host with VLAN segmentation, zone-based firewall policy, and isolated management networks
- Cut device-management costs by adopting a hybrid MDM model with Apple Business Manager and ManageEngine, standardizing enrollment and security policy across the company device fleet
- Eliminated production-breakage risk by building a dev pipeline from zero: four isolated environments, ~840 automated tests, and a release gate that blocks any build that fails to start
- Met HIPAA Security Rule safeguards for PHI systems by architecting network segmentation and role-based access controls, verified by test
- Protected business continuity: brought an undocumented production system under version control with runbooks, added off-site backup with verified restore, and resolved at-home remote-access failures with an overlay addressing scheme and source NAT

Network Technician | RabenIT

Phoenix, Arizona | August 2024 – July 2026

- Troubleshoot Layer 1 and Layer 2 connectivity via SSH, Cisco IOS, and Wireshark to restore multi-site service
- Install and terminate Cat6 cabling, crimp RJ45, and deploy access points across 20+ sites, validating links with testers

Project Manager | Arizona Baseball Software Development Team

Tucson, Arizona | Sep 2025 – May 2026

- Led a cross-functional team of eight to build predictive performance models from TrackMan batted-ball data
- Wrote the Python analysis and engineered an xHR metric (home-run likelihood across 60+ NCAA stadiums) adopted program-wide for player development

EDUCATION

University of Arizona | B.S. Computer Science, Minor in Business Administration

Tucson, Arizona | August 2022 – May 2026

CERTIFICATIONS, LEADERSHIP & AWARDS

CCNA Certified (Cisco Certified Network Associate)

March 2026 – March 2029

Trip Staff Leader | Mayanot / Chabad

May 2026 – June 2026

- Led 50 participants across a 10-day international trip; managed logistics, scheduling, and group coordination

Philanthropy Coordinator | Zeta Beta Tau Fraternity

Nov 2023 – Nov 2024

- Raised \$8,000+ for the Children's Miracle Network through coordinated fundraising events

Risk Management & Wellness Director | Zeta Beta Tau Fraternity

Nov 2022 – Nov 2023

- Recognized as "Most Outstanding Risk Management" among 22 fraternities at the University of Arizona

SKILLS

Networking: Cisco IOS, VLANs/802.1Q, zone-based firewall, NAT, routing, VPN, DNS, DHCP, HSRP, Wireshark, UniFi, Cat6/fiber

Infrastructure: Proxmox VE, KVM, ZFS, Linux (Ubuntu/Debian), systemd, Apache/Gunicorn, AWS EC2, Docker, Tailscale

Security & Compliance: HIPAA Security Rule, role-based access control, audit logging, SAML SSO, MFA, TLS/certificate management, network segmentation

Programming & Software: Python, Flask, FastAPI, Java, JS/TS, SQL (MySQL/PostgreSQL), React, Next.js, Node.js, Git, CI

Business & Operations: subscription rationalization, requirements gathering, technical documentation, runbooks
